- React & Redux
- Asynchronous/promises/Ajax
- Task runners & bundlers

ABOUT

I'm a curious and driven person, a lifelong learner, a teacher, and a musician who in May 2017 started coding and discovered in it a huge passion. I'm excited about technology, working with teams on projects, and the constant learning required to excel in this field.

I invite you to take a look at my portfolio and Github to see examples of the many self-initiated projects I have completed and the tech I'm interested in.
